A Junkie Is Dead

Amy Winehouse was found dead in her bed Saturday afternoon security guard who her record label had appointed to help look after her over the past couple of years.

This has had the completely expected but still pathetic result of inundating the media with “tributes” to Winehouse in a sort of mass hysterical eulogizing the dead twenty-seven year-old drug addict.

Amy Winehouse was a junkie. Junkies die, normally young, every day of every year. Right thinking societies that haven't degenerated beyond recognition don't paint them as anything other than that.
