#### **Pete Doherty is my favorite crackhead**

Is Pete Dougherty serious? We could count on a bi-monthly appearance by Libertines ex-frontman, Pete Doherty.

The Babyshambles front man was arrested Saturday (Nov. 18) in London, when police pulled him over and allegedly discovered crack cocaine on his person. Two other occupants of the car were also arrested, though authorities haven't given us their names.

While the bust adds to Doherty's legendary drug-related rap sheet, it's probably not the best news for the high-profile drug enthusiast. He's already under a court-supervised rehabilitation program after copping a guilty plea to seven charges of drug possession in September. Of course, it's been a busy year for Britain's crackhead pin-up, as he also ran afoul of Swedish immigrations for attempting to sneak cocaine into the country this summer, was the subject of a German drug investigation, got arrested for possession only hours after leaving court on other charges and, setting the bar for legendary rock-star stupid excesses, getting nailed for possession twice in one day.

Apparently the former Libertines frontman got engaged to Kate Moss at the end of October also. I wonder how those two crazy kids will celebrate...
